

Leadership Development Plan

The Lifesaving Society's Leadership Development Plan is a tool which is used to create a goal-focused action plan that results in improving leadership competency. It may be completed in conjunction with a mentor.

The first step in the development plan is to indicate if the individual is meeting the performance criteria at the appropriate level for each of the core competencies, and to identify development goals for each competency as required. Individuals are to indicate what activities will help meet development goals, and identify specific actions to complete to reach the goal. Development goals should be as specific as possible; measurable; achievable; realistic; and will have a targeted completion date.

The completed Leadership Development Plan is to be retained and referenced by the individual. Supports may be put in place to help the individual achieve goals, but ultimately it is the responsibility of the individual to follow through with carrying out the specific actions of the development plan.
